

Decorative poles

Decorative poles

Decorative poles have to be functional by night yet need to add distinction and ambience to the streetscape during the day. Whether the aim is to create individuality to an urban area, styles are versatile and varied, incorporating federation, colonial heritage as well as contemporary designs to fit into any architectural surrounding.

Applications

- Residential subdivisions
- Commercial subdivisions
- Shopping centres
- Universities
- Pathway lighting
- Park lands

Design options & accessories

- The decorative pole range is standard base plate mounted, however in-ground mounted can be designed.
- All poles are hot dip galvanized to AS/NZS 4680:2006, and can be powder coated or painted.
- The decorative pole range is available in a single or double outreach arrangement.
- Security or tamper proof screws for access door covers.
- The product data sheet represents a standard range, but other heights and section sizes can be custom designed to meet specific requirements.
