

Banner poles

Banner poles

Banner poles are used to promote activities and community events while adding colour and energy to any streetscape. Whether it is tapered round, tapered octagonal or a decorative type, the banner poles are engineered not only for high winds but also to facilitate the use of lighting fixtures.

The banner pole is a great way to relay information on leisure and recreational opportunities in and around the city streets to residents and visitors alike, with the added feature of illumination.

Applications

- Exhibition centres
- Sporting centres
- Shopping centres
- Universities
- Pathway lighting
- Park lands
- City streets
- Show grounds

Design options & accessories

- The banner pole range is standard base plate mounted, however in-ground mounted can be designed.
- All poles are hot dip galvanized to AS/NZS 4680:2006, and can be powder coated or painted.
- The banner pole range is available in a single or double arrangement, with or without lighting
- Security or tamper proof screws for access door covers.
- All heights and section sizes can be custom designed to meet specific requirements.
